

Field Test Instruments

Design Water Technologies pH meter

- Meter kit includes meter, instructions for usage, and 3 pH packets of pH 7 and 4 solution.
- Meter automatically registers and adjusts to water temperature.
- Registers water temperature in either Fahrenheit and Celsius.
- Meter is completely water proof.
- Easy digital display that flashes until reading is stable.
- pH range is from 0.0 to 14.0.
- Accuracy is within 0.1 pH.
- Automatic shut off when not in use after 8 minutes.
- 300 hours of battery life with battery level display.
- 4, standard 1.5 v, replaceable batteries.
- Automatic calibration. Just dip into the calibration solutions.
- Replaceable electrode. Tool included in kit.
- Sealed cap can be filled with the 7.0 calibration solution or cleaning solution to prolong electrode life.
- 3, 20 ml packets each included in kit for calibration to a pH of 7.0 and pH of 4.0.
- Easy to follow calibration and operation instructions.
- Includes field instructions to monitor pH and color with the "Unicid" chemistry and with "ChloralPal" & chlorine.

List Prices Effective January 5, 2004

Design Water Technologies pH meter, includes case, field instructions,
3 calibration packets each for 7.0 pH and 4.0 pH solutions \$140.00

Replacement items

HI70007	Box of 25 packets (20 ml) 7.0 calibration solution	\$40.00
HI70004	Box of 25 packets (20 ml) 4.0 calibration solution	\$40.00
HI7061	230 ml electrode cleaning solution	\$20.00
HI70300M	230 ml electrode storage solution	\$20.00
HI73127	Replacement electrode	\$80.00
HI73128	Electrode replacement tool	\$26.00
